EXPERIENCE

Meta (formerly Facebook)

Menlo Park, CA

Software Engineer Intern

May 2022 - Aug 2022

- Developing internal tools to provide time solution and improve enterprise's calendar
- Applying **React.js**, **Relay**, and **JavaScript** to implement user-friendly web UI
- Using **Hack/PHP** to build product infra

Homesite (a part of American Family Insurance)

Boston, MA

Software Engineer Intern

May 2021 - Aug 2021

- Developed the Insurance Sales Platform for Costco and General Motors (OnStar) collaboratively with other divisions in an **agile environment**
- Implemented location-based product selection on landing page which streamlined user interaction and improved information transparency by leveraging **TypeScript**, **React.js**, and **Material-UI**
- Optimized **Redux selectors** which enabled platform to render discount information of products based on customer's personal selection and address
- Refactored insurance coverage page which reduced 50% of HTTP requests and enhanced UX for 200,000+ customers

PROJECTS

KV-Store | System

Mar 2022 - Apr 2022

- Built a key-value data storage that saves and retrieves data by keys using **C** in **Linux**
- Applied POSIX Threads and Monitors (mutex + condition variable) to achieve concurrent computing
- Implemented B+ Tree to improve time performance for read, write, and delete operations

Cupola | Full Stack | <https://cupola.herokuapp.com/>

Jan 2021 - Apr 2021

- Built a web platform for buyers and sellers to post & view real-time real estate listings, bid to make an offer
- Leverged **Node.js** and **Express.js** to develop **RESTful** web service for the UI
- Enhanced search results by combing data from different APIs including Zillow, Yelp Fusion, and Google Maps

Explore&Mark | Mobile | <https://github.com/saryn-equinox/Explore-Mark/>

Dec 2020 - Jan 2021

- Developed an iOS app with **Swift** that allows users to explore attractions near their location and share their journey
- Implemented project in **MVC** framework to organize project structure and promote loose-coupled code
- Applied iOS CoreData and **Firebase Realtime Database** to store app and user data as well as **Firebase authentications** to secure user information
